

ESSEGOMMA
POLYPROPYLENE YARN

Essegomma is a company that was founded by the Seroldi family and has been producing multifilament polypropylene yarn since 1983.

Since 2000, Essegomma is specialized in indoor/outdoor furniture yarns and, with over 400 tons of yarn produced each month, it is positioned amongst the major manufacturers in Europe, exporting to over 40 countries as a strategic partner for innovative products thanks to continual investment in research and development.

Every aspect, from receiving the raw material to the finished product, is managed in-house.

The company is based in the Groane
regional park north of Milan,
integrated free from any environmental
consequences and is carbon neutral

from the raw material to the finished product

The technology employed utilizes proprietary hardware and knowhow derived from in-house research and development.

The spinning plants are designed and
manufactured by Essegomma with the
use of unique technology

all with zero impact

Part of the energy consumed is self-generated thanks to over 5000 square meters of solar panels and the entire company is heated through the recycling of energy.

The staff members chosen for this task undergo continual training courses and are informed in relation to the requirements of the client

infinite types of yarn

Each plant is different from the rest, in order to obtain the best possible performance to ensure the parameters requested. Upholstery and technical fabric, braid, rug, knitted fabric, air and liquid filtration, automotive.

Quality control, this is performed at all production stages from receiving the raw material, to spinning, coloring, tenacity, packaging and finally, every spool is manually checked by specialized technicians

the yarn is designed in relation to the item for which it is destined

High tenacity, intermingled, twisted, texturized yarns from 60 to 4000 denier for multiple uses:
